RESEARCH INTERESTS

A first line of research concerns **the role of planning in shaping urban/rural relationships**. The main focus is on investigating collaborative planning policies and local governance processes aimed at improving the role of agricultural production in sustaining more localised food systems and in building stronger functional ties among city and countryside. This topic is developed through the ongoing thesis work. Two significant publications dealing with this topic are: Lazzarini, L. (2018), The role of planning in shaping better urban-rural relationships in Bristol City Region, Land Use Policy vol. 71, pp. 311-319; Lazzarini, L. (2017), Soft Cooperation and Rural Development in Aso Valley in Italy, Journal of International Scientific Publications: Agriculture & Food, vol. 5, pp. 238-251.

A second area of interest regards the **forms of urban and territorial project**. This area is currently explored through the activity as Teaching Assistant at Politecnico di Torino. In the past, this interest was developed during the research carried out for the master thesis “Beyond the Longitudinality. Recomposition trials for Tronto Valley” (supervisor: prof. Marco Mareggi) and during the past activity as Teaching Assistant at Politecnico di Milano. The territorial contexts where this research exploration has been developed are mostly the **everyday urban landscapes** («paesaggi della città ordinaria»). The publications dealing with this topic are: Lazzarini, L. (2016), The Everyday (in) Urbanism: What’s new on the spot? Sociology Study, April 2016, Vol. 6, No. 4, pp. 255-266; Lazzarini, L., Mareggi, M. (2015), Rigenerare lo spazio urbano dilatato. Urbanistica Informazioni, 263 s.i., pp. 73-76; Lazzarini, L. (2016), Contrasti e convivenze lungo la Salaria. In: Cinciripini, D., Marchionni, S., eds., Bab 01 Balene ai bordi, 1 (1).
