Genealogie urbane tra infrastrutture e conflitti

A planetary navigation between multiple panoramas and long times to trace what changes and what lingers, to discover what happens when the city and the countryside explode to become metropolises and it proves impossible to grasp an outside. Niccolò Cuppini responds to this and more through a genealogy of urban forms elaborated in light of a logistic and political paradigm. Comparing with the most recent critical literature, the volume traces the story of the relationship between the urban and the various industrial revolutions that have occurred throughout history.

Niccolò Cuppini is a lecturer at the University of Applied Sciences and Arts of Southern Switzerland. He is an urban scholar focused on developing a political theory surrounding modern urbanization processes. His research delves into the intricate urban implications of logistics, digital platforms, and social conflicts, providing critical insights into these multifaceted phenomena.

NICCOLÒ CUPPINI

11/04 _ 4 - 6 p.m.

Presenter: Elia Silvestro, DIST PhD Candidate

Discussants:

Luca Bertocci, DIST PhD Candidate

Alberto Valz Gris, DIST Research Assistant
