

## SPECIAL ISSUE

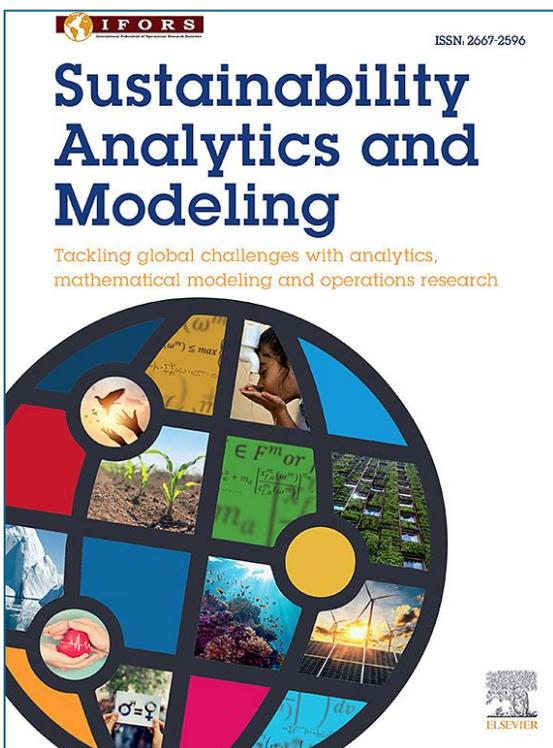

# Shaping Sustainable Cities: Mainstreaming Assessment Methods and Development Strategies for Resilient, Circular, Digital and Inclusive Cities

## *Sustainability Analytics and Modeling*

This Special Issue emphasizes the role of assessment and evaluation methods and development strategies in supporting the development of the built environment and including citizens in the transformation of cities. We invite papers on state-of-the-art research and innovative approaches to sustainable, inclusive, resilient, digital and circular cities and urban development. Papers can include monitoring and assessment frameworks for, quantitative modeling and/or analytical approaches, as well as applications to empirical case studies that fit the scope of the journal.

This special issue is dedicated to the 34<sup>th</sup> European Conference on Operational Research (EURO) 2025. Participants of the conference are encouraged to submit relevant work. We also welcome submissions from the entire community of academics and practitioners working in the field of urban development and environmental management.

## Submission deadline: 31 December 2025
