### Shifting the Center from Fragility to Resilience

The Pan-African Architecture Biennale, opening in Nairobi on September 1st, 2026, proposes a shift in paradigm: to bring Africa back to the center of the global architectural discourse, highlighting its spatial intelligences, its building cultures, and the forms of resilience developed through historical, political, and environmental fragilities.

The Turin event presents the curatorial vision of Omar Degan, introducing the theme, objectives, and international collaborations.
