PhDs Behind the Scenes

Climate migrants, built environments and feelings of place attachment

Welcome:

Marco Alioni

Politecnico di Torino

Speakers:

Tugba Altin

Rutgers University | Newark (New Jersey, United States)

This review examines the literature on place attachment and climate migration for a better understanding of the relationship between the built environment, climate migrants, and their feelings of place attachment. Through these perspectives, the discussion is centered around two fundamental discussions: forced displacement's psychological and place-wise impacts on people, and the role of environmental dimensions on the recent migration trends.

Tugba Altin is currently a Ph.D. candidate in Global Urban Studies at Rutgers University | Newark (New Jersey, US).

Her current researches focus on environmental refugees, place attachment, displacement, urban design for PTSD, climate change & climate justice.
