Transnational research involves research in one country and where the findings are compared to the extant studies in the larger field. It also involves the search for common effects and situational influences toward a particular research topic. In this seminar we discuss some transnational dimensions of socio-spatial research practices in order to elucidate possibilities and critical issues in transnational urban and landscape research. In particular, attempts will be made to investigate the characters of transnational research built around networks of researchers located between Italy and Latin America.

Interuniversity Department of Regional and Urban Studies and Planning
