

# CHINA ROOM SEMINAR SERIES

Coordinated by **Camilla Forina** and  
**Leonardo Ramondetti**

**Yixin Zhang** (DASP - XXXVII Cycle) discusses her current doctoral research, which aims to explore what facility layout encourages people travel in a green way (walk and bike) rather than by bus and car, including the influence of block size on service facility distribution within living circles and extracted the prototypes of the living circle of two cities Tangshan (China) and Turin (Italy).

**Yaowu LI** (joint PhD of school of Architecture of Tsinghua University and Sapienza University of Rome) and **Mauro Berta** will participate as discussants.

## TOWARDS A GREEN TRAVEL LIVING CIRCLE IN TURIN VS TANGSHAN:

A study on the interaction between  
facility layout and travel behavior

**15 November 2024**  
Sala Mollino - Castello  
del Valentino

11:00 - 13:00 (CET)

Politecnico  
di Torino
